

CLEANING AGENT - MAALIPESU

DESCRIPTION	Alkaline cleaning and preparatory detergent for cleaning interior and exterior surfaces prior to painting.
EXAMPLES OF USE	Cleaning Agent is particularly suitable for cleaning both painted and unpainted surfaces badly contaminated with dirt, grease, oil and wax, etc., when strong dissolving power is necessary without the adverse effect of solvents. Note: Cleaning Agent is not recommended to be used on sheet metal roofs.
PREPARATION	Remove all loose and flaking material. Treat areas affected by mould and algae with Tikkurila Mould Removal Solution.
METHODS OF APPLICATION	Sponge, Brush or Cloth.
DIRECTIONS FOR USE	Apply undiluted Cleaning Agent onto heavily contaminated, hard, and glossy surfaces allowing several minutes before washing off carefully with clean water. Undiluted Cleaning Agent will leave the cleaned surface matt which helps in the adhesion of new paint coatings. On waterborne latex and other matt painted surfaces apply Cleaning Agent diluted with water in the ratio of one part Cleaning Agent to ten parts water. Diluted Cleaning Agent (ratio 1:10) can also be used as a cleaning detergent. Note: When using Cleaning Agent wear appropriate safety clothing i.e. gloves and safety glasses in case of splashes.
Cleaning of Tools	Clean immediately after use with water.
PREVENT ENVIRONMENTAL DAMAGE	Empty cans should be recycled or disposed of in accordance with local regulations. Liquid waste should be destroyed according to the local regulations.
TRANSPORT	ADR/RID - Protect from frost.
